REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 27 | THE REDCLIFF REVIEW | THURSDAY, OCT. 6th, 1938 | Number 17

Secretary of Swimming Pool Gives Report

Financial Statement For This Season

The following is the financial statement for 1938 as prepared by the Secretary of the Redcliff Swimming Pool Association:—

Assets

Bank Bal. Jan. 1st '38	$213.41
First Carnival Profits-	$447.57
Sec. Carnival Profits-	$208.15
Guessing Tickets-	$27.50
Swimming Pool Tickets-	$96.50
Gala Night Profits	$158.58
Donations in Cash-	$711.00
TOTAL	$1862.71

Included in the above donations is one of $50.00. from the Gunderson Brick and Coal Co.- also $2.00 from Mr. Yeo of Medicine Hat. for which we extend sincere thanks.

The $125.00 from the town went to the building committee and is therefore not included in the above list.

DEBITS

Transferred to Building Account-	$1569.27
W. Campeau re donat's	$10.10
Caretakers' Salaries-	$87.00
T. Fitzhenry (garbage)	$2.00
C. T. Hall (disinfectant)	$5.45
Prize for best Park Plan	$10.00
Revelstoke Co. (posts)	$17.25
J. Bergeron (cartage)	$2.00
Printing (Review)	$5.00
W. Nussey (grading)	$60.45
W. Funnell (painting)	$12.00
S. Schnieder	$7.15
Stamps and stationery	$3.42
TOTAL	$1791.10

CREDITS —$1862.71
DEBITS —1791.10
BAIANCE $71.61

All books and bills are open for public investigation if desired.

The Parks will be the next active committee. It is estimated that in the vicinity of $1000.00 will be needed to complete plans. Several interesting programs will be put on commencing in the near futuse.

In thanking you for your financial support in the past the President and Executive sincerely hope you will rally round the Park committee.

Respectfully submitted
Bert Allison
Secretary Treasurer

At a Liberal convention to be held in Medicine Hat on October 12th, report is to the effect that Dr. Gershaw will be the only nominee at the convention. Another report is to the effect that some young man will be nominated also and will be left to the meeting. There is no doubt Dr. Gershaw is the most popular candidate

Many of Opinion Memorial Satisfactory

Wet Weather Delays Work For A Few Days

The War Memorial which has been under construction for the past few weeks is nearing completion. The column itself is complete. It only remains for the cement base to be put in place and the cleaning up to be done. When this work is finished it is conceded by many that our War Memorial will be a credit to our town, to the builder, Mr. Rende, to those who have worked so assiduously to augment the memorial fund and certainly to those who donated money or materials to make the undertaking possible

Owing to wet weather recently th completion of the work will be somewhat delayed, but the work will be resumed and completed at the earliest possible moment.

FIRE

Civilization began with the discovery of fire by prehistoric man And for many a human being civilization so far as he personally was concerned, has ended with a fire!

It is a curious truism that one of man's essential aides is like wise, under other circumstances, one of man's worst enemies. Controlled fire is a boon. Uncontrolled fire is a destroying demon.

Th problem of controlling fire is as old as history. Immense progress has been made in the direction of perfecting fire-fighting apparatus and equipment, and developing materials that resist fire. The fire department of yesterday is a ludicrous thing in comparison to the amazingly efficient fire department of today even as building construction of yesterday offered a veritable invitation to fire.

Aggressive effort ras been made in recent years toward educating the public in preventing fire—and here, too progress has been chalked up but on nowhere near a comparable scale. Some of us have learned the simple lessons that will eliminate most hazards; many of us have not. It is a safe bet that at least one home out of two— and this includes new as well as old ones— contains flagrant hazards which the owner disregards.

In the law, ignorance is no ex cuse, and it would be a fine thing if that same principle were extend ed to cover the harboring of fire hazards. Each year, loss running into millions results from the improper storage of inflammable liquids, from needless accumulations of waste, from amateur tampering with electric fixtures, from carelessness with smoking

as these are responsible for a materials. SSuch "little" things majority of all fires.

SCHOOL NEWS

The Literary Society held its meeting in the school auditorium.

The business was opened by the reading of the minutes by the secretary, Carol Sellhorn. Nominations were then in order for a new improvement committee. The students to form the new committee are Cecil Sangster, Helen Rexin and Mary Sween.

The School Literary Gleaner was then read by Dolores Buchholz. This proved to be a long and entertaining paper for the students.

Flora Stratton, accompanied by Doreen Cooke on the piano, favored the students with a tap danc. This was followed by a spelling match between Grades Eight and Nine.

Thus the meeting closed with more educational value than before and we hope will be continued with sucess in the future.

Contributed by M. L.

Shooters Should Have License For Ducks

Game Guardian and R.C.M.P. Are After The Hunters

Check-up on the duck hunters is being made by the Provincial Game Guardian and the R.C.M.P. Warnings have been issued to the effect that hunters shooting more than twelve ducks will be prosecuted. Those shooting without a license will also be prosecuted and offenders are liable to have their guns confiscated.

e Game Guardian and R.C.M.P. have already caught several who were shooting without licenses. These lawbreakers have been fined.

Kenneth Blaney, aged 26 of Medicine Hat, died suddenly of pneumonia at McLeod on Tuesday, Kenneth was well known by many young people here who will regret to hear of his untimely passing. Mrs. Robt. Stratton is a sister of the deceased, and to her the sympathy of the community goes out in her sad bereavement.

Volunteer Band Appeals To Citizens For Co-operation

A Communication From President Mackenzie

We have been requested by the Executive of the Redcliff Citizen's Band to make a statement for publication outlining the aims and objectives of the organization.

It is feit that if the citizens are given a clear and concise outline of the movement they will more willingly lend their support. This course is, therefore, taken in the earnest hope that our appeal for support from the citizens will be favorable. In return it is the intention of the Citizens' Band to train a unit which will be second to none in the quality and quantity of music produced.

Citizens' Band movements in towns the size of Redcliff are necessarily voluntary. It has been found that the downfall of these movements has been through lack of appreciation of this point.

To this end the present organization has drawn up a few simple rules which will be incorporated in its bylaw. A statement of these rules follow and it may be seen that these principals should preclude any chance of general friction within the organization so that success would seem to be assured.

1. Business with the band may only be done through the Manager.
2. Remuneration will not be paid to any member of the band organization.
3. Any expenses in connection with engagements will be paid by the Secretary-Treasurer of the organization upon order by the Manager and will be bounded by funds in the possession of the organization.
4. Any donation, collection, or remuneration for services, will be paid into the band funds.
5. Any expenses incurred through engagements in Redcliff or other places will be paid by the Secretary-Treasurer and will include compensation to members for loss of salary due to having to take time off from work.

It is felt by members of the Redcliff Citizen's Band that voluntary service to the community based on the principles above is well worth while and we make a personal appeal to all citizens to lend their support so that members will feel that their services are appreciated.

J. R. McKenzie
President

Alas! and Alack!! How brief is the life of a king! We had begun to think that Mr. A. E. Oakland would continue indefinitely in undisputed possession of the title "King of Tomato Growers," with his 20 ounce tomato. But what was our amazement to see Mr. Wm. Nussey bearing down upon the Review Office and carrying, unassisted, what surely must be the father of the great Tomato family. This monster vegetable (or is it a fruit?) tipped the scale at 1 lb. 12 oz. Can you beat that! Thus King Oakland automatically abdicates and King Nussey succeeds to the title. And not a blow struck!

Auction Live Stock At Bi-Weekly Sales

Will Be Held at St. Boniface Stock Yard Winnipeg

Commencing October 13th at the St. Boniface Stock Yards, Winnipeg, facilities are to be offered for the buying and selling of live stock by auction. the Marketing Service of the Dominion Department of Agriculture has announced. Co-operating with the Deppartment are the United Stock Yards Company and the live stock commission agents at yards. Sales are to be held every Thursday and Friday until further notice unlesspublic holidays intervene. Contributions to thos sales will be voluntary.

Looks Now That Mr. Chamberlain is Right

Claims His Conviction Agreement Has Averted War

The House of Commons today endorsed Prime Minister Chamberlain's peace deal with Chancellor Hitler at th end of a three-day debate. The government was sustained on the main motion of confidence 366 to 144. after a Labor amendment had been defeated, 363 to 150.

Mr. Chamberlain declared his conviction the Munich agreement had averted war.

The government's peace policy he claimed, saved Czechoslovakia from destruction and Europe from Armageddon.

Miss Laurie Maillard celebrated her twelfth birthday on Monday by entertaining a number of her young friends to an enjoyable birthday party. After games in which all joined heartily, a delicious supper was served, the Cake with its twelve candles forming a pretty centre for the table.

The Fish and Chip Supper held in Gordon Memorial Church basement last Monday evening was only fairly well attended owing to the inclement weather

The tables with their profusion of cut flowers looked very attractive and a most delicious meal was thoroughly enjoyed by those who attended.

Mr. and Mrs. Benj. Ross and daughter, formerly of Redcliff but now of Olds are visiting in and about Redcliff at present. They spent the week end at the Dubeau Ranch and are now visiting the Bamforth family. Mr. and Mrs. Ross expect to leave in a month's time for California where they will spend the winter.

Manyberries Range Advises For Crops In Fall Months

Assures That Fall Rye is Sure Annual Forage

Fall rye, is one of the surest annual forage crops. It usually makes considerable growth in the fall months and in this way gets an early start in the spring and produces a crop before the hot weather of mid-summer. In most cases, the crop is grown for hay but it is also widely used for pasture and for grain. Due to the fall growth rye is important in the control of soil drifting especially during the late fall, winter and early spring months. It also provides pasture early in the spring and this early growth results in weed control and a clean crop.

The Dakold variety is recommended. Seeding is at a rate of about one bushel per acre and seeding on land with a cover of stubble is preferred. The crop should be seeded early in the fall, preferably in September although seedings made early in October usually give good results. Care should be taken, however, not to seed until danger from grasshopper damage is over. Early seedings are important in order that the plants become well rooted in the fall so that winter killing will not be serious.

Where the crop is to be cut for hay, it should be harvested in the early dough stage. At this time the grain is fairly mature and the straw is still green and palatable. Early cutting, at about the flowering stage, is not recommended since the crop is not as palatable nor as nutritious at this stage.

Rye grain, when mixed with other feeds such as oats, corn or bran can be fed to livestock with good results.

Monday's rain held up threshing in the district for a while but in many districts thre shing has been going on splendidly for the past few weeks, and many are finished. Several trucks are delivering wheat to the mills.

Vigilance Means Safety

With the shooting season for birds now in full swing and the time for hunting of big game to follow a little later, it is an appropriate time to remind all who handle rifles, shot guns and revolvers that sudden tragedy lurks close by for some victim of carelessness.

Now is the time to remember that all too frequently it is the "unloaded gun" that unwittingly snuffs out a life or is responsible for irreparable injury to a child, a relative or a companion, or that he who is careless with firearms may cause death or injury to himself without a moment's warning.

* * * *

How It May Happen

There are those who will go out blithely for a day of enjoyment in the crisp autumn air and who will return to their homes full of grief and remorse over some accident for which a moment's thoughtlessness was responsible and the memory of which will never be entirely obliterated.

There is the sportsman of excitable temperament who is too keen to get in his shot and will not wait before pressing the trigger until he is quite sure of the nature of the object at which he points his weapon. He sees something move and that is sufficient. He raises his gun to his shoulder and lets fly in the general direction of the movement. His quarry may be a bird, it may be a dog or a cow or it may spell "curtains" for a child or a hunting friend.

Then there are those hunters who will surround a comparatively small slough laden with ducks and who pull the trigger hastily in their anxiety to get a bird without making sure that their companions are not in line to receive all or a portion of the discharged pellets. Such accidents are too common around sloughs skirted with bush which may render visibility imperfect.

There are also those who, despite the cautions frequently uttered by those well versed in rules of hunting, will carry their loaded guns at a dangerous angle, risking the lives of their companions; those who will drag guns through fences without regard to the direction of the muzzle and the risk of snagging the trigger; those who will place loaded guns in the house inviting death for some innocent child or curious adult and those who, despite the law to the contrary, will persist in firing guns from a moving automobile, wagon or buggy.

All of these and others who violate the huntsman's common rules of safety are a constant menace during the hunting season. None of them can be charged with murder, yet the result of their actions may be the same as those of the man who sets out to kill deliberately his kind, but they cannot be excused because lack of ordinary precautions were not taken or because the commonsense rules of safety were not observed.

* * * *

Rules Of Safety

"Safe carrying of guns must become a definite habit", recently said C. K. Howard, manager of the Fish and Game Department of the Canadian National Railways, in an interview outlining a few suggestions, the rigid observance of which would constitute an insurance policy against regrettable accidents.

"The golden rule is that the muzzle of a carried gun must never sweep the horizon," he continued. "If an accident discharge takes place it should send the shot into the ground before the feet of the person carrying the gun, or into the air. No gun should ever be allowed to point towards the person carrying it nor toward any other person.

"Guns being taken into boats or vehicles, or over fences and other obstructions, should precede the person carrying them. Cartridges should be removed on entering camp or a house. Loaded guns should never be aimed at anything unless the person intends to pull the trigger. No loaded gun should be placed where it may be knocked down by a dog or a child, nor can there be any excuse for a loaded gun standing where it may be handled by a person who does not know that the weapon is loaded.

"Perhaps the most frequent cause of shooting accidents is the dangerous habit of some hunters who shoot at 'something moving in the bushes' without first making certain that the moving object is the game they seek rather than a hunting companion."

As Mr. Howard properly observed, "Few accidents happen to people who are careful of their guns. The precepts of safety are simple. If they are generally observed many lives can be saved each hunting season. The hunter must never forget that the man who 'didn't know it was loaded' is always with us."

Mr. Howard struck at the root of the matter when he said that few accidents happen to people who are careful with their guns. It is true there may be an occasional accident which could not be foreseen or prevented, as for instance, when the hunter with his eye on his quarry trips over some minor obstacle at his feet, but such accidents are rare and nearly all the tragedies that occur in the hunting field can be attributed to carelessness and sometimes to criminal negligence.

Accidents which fall in this latter category can be avoided every time, but only by rigid observance of the few simple rules laid down by Mr. Howard in his timely interview. Sportsmen should always be on the alert to prevent such accidents and remember that eternal vigilance is the sole price of safety where guns and ammunition are concerned.

A Real Drought

Only three showers that could be measured have occurred in the last 18 years in the Arica district of Chile, which is reputed to be the most arid section in the world as far as rainfall is concerned.

New Post Offices

Two new post offices were established in Saskatchewan recently. One is named Lone Spruce and is situated in the Prince Albert electoral district, and the other is known as Trojan in the Rosthern district.

A harmless and inexpensive spray, worked out by Government chemists will dye lawn grass a healthy green to match the weeds.

On a bright day the surface temperature of an asphalt road may be 150 degrees Fahrenheit or more.

The colors in Yellowstone's famous rocky canyon are due to hot waters and gasses.

Voting In The Bahamas

Ballot System May Replace Oral Method Now In Use

Voters line up alphabetically at the polls to elect their candidate to office in the Bahamas legislature by the antiquated viva voce (oral) method of voting now, but a plan to change that is afoot.

Voters in the Bahamas mark no ballots. On election day, they go to the polls and are asked for whom they wish to vote. Their answers are entered on a printed form by a recorder.

When Harry Oakes, Canadian gold mine operator, defeated Milo Butler, negro grocer, for the Legislature in the Nassau election several months ago, the campaign was so well organized that Oakes' supporters were lined up alphabetically at the polls.

Women cannot vote in the Bahamas. Men over 21 who own real estate or household property to the value of $25 or more qualify as electors. Members of the legislative council or the representative assembly must own real or personal property to the value of $1,000.

First Gold Brick

Production Has Started At The Yellowstone Mine

Signalizing the start of actual gold production in the Northwest Territories, the first gold brick, weighing 72½ pounds, was poured recently at the Consolidated Mining and Smelting Company's Yellowstone mine, it was announced by Dr. Charles Camsell, deputy Minister of Mines and Resources for the Dominion.

Dr. Camsell, accompanied by G. Hanson, assistant chief geologist, of the Federal Geological Survey department, arrived at Edmonton after a tour of northern mining centres in Canadian Airways 'plane piloted by Con. Farrell.

Dr Camsell officiated at the pouring of the brick.

Canada's War Memorial

Seventy-Foot Arch Is Now Being Erected In Ottawa

Behind a gray board fence across Wellington street from the Parliament Buildings' cast block, in Ottawa, Canada's towering national war memorial is slowly being erected 12 years after the design was originally selected.

Located in downtown Ottawa on the Plaze, the 70-foot memorial will face south to the Rideau Canal and the famous driveway. Back drop for the huge memorial is the parliament buildings, the Ottawa River and the distant Gatineau Hills.

The structure when finished will be a granite arch topped by bronze figures of victory and liberty with a military group passing through the arch at the base.

Will Your Lantern Stand This Test?

A hurricane, as officially defined by the United States Weather Bureau, is a wind "exceeding 75 miles an hour".

Tests just completed by Aircraft engineers on a Coleman Gasoline Lantern placed in a wind tunnel and subjected to a gale of 100 miles an hour couldn't blow out the light.

The secret of the Coleman Lantern's ability to withstand these high winds is due to the design of the heat resisting glass globe which deflects moving air away from the lighted mantles, it being impossible for direct blasts of air to strike the point of illumination.

Constitute A Menace

One Driver In Every Ten Afflicted With Night Blindness

Ten per cent. of automobile drivers are afflicted with "night blindness," a sudden failure of vision with the approach of darkness, Dr. Ulysses Forget, Warren, R.I., said in a paper delivered to the Association of French-speaking Doctors of North America in convention at Montreal.

"If such people drive a car at night, without realising their affliction, they are a menace both to themselves and others," he declared.

Thrills For Onlookers

Pilot Shows What Skill Can Do In An Emergency

Icy nerve plus superlative ability and judgment combined to thrill military and newspaper observers at Camp Borden with an example of what can be done in a moment of emergency.

The pilot of an army co-operation plane of the Royal Canadian Air Force, taking part in the war manoeuvres sent chills up the spines of those on the ground as he swept close to the ground at terrific speed and hooked a despatch which had been strung on wires between posts in the middle of a cleared field.

Circling far above, the plane suddenly went into a steep dive, a steel hook dangling from below the landing gear. Coming almost to ground level, the plane flattened out, sped between the posts and missed the message by inches. Quickly the pilot put his machine into a steep climb and went back east of the field for another attempt.

With the wind screaming in the struts and the observers on the ground almost reconciled to a smashup, the plane dived once more and there were gasps as the machine appeared to be headed directly for the trees. But the pilot knew his job. He skimmed the tree tops and went straight for the centre of the two posts. For a moment it seemed as though the hook had again missed its objective, but as the plane rose once more it was seen to have securely caught the paper.

A FROCK MATRONS WILL ADORE

By Anne Adams

What a flattering picture your full-length mirror will reveal when you wear this new afternoon slimmer by Anne Adams! Pattern 4686 is definitely charming as well as slimming—the sort of frock that women feel like copying the minute they see it! Just select one of the lovely firm Fall Synthetics—or perhaps a silk with a raised self-design—and follow the helpful advice of the Sewing Instructor. You'll find that every seam is quickly and easily completed! Note particularly the button-trimmed, full-length panel with its centre pleat for walking ease. Then gaze carefully at the collar-flattered neck; the becoming gathers springing from the pointed yokes!

Pattern 4686 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4¼ yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Boast Out-Of-Date

It used to be—it still is with a few—the practice to boast about how fast the "boat" or "old bus" could travel. That was foolish; the sensible idea is to drive always so that the car is under control and let the surplus speed lie in reserve until emergency demands it.

People will always get along just as long as they don't get too anxious about making money.

"Are you doing anything for the preservation of antiques?"

"You bet I am, I sell cosmetics."

Cottontail rabbits communicate with each other by rubbing whiskers and stamping their feet.

SEND FOR THIS FOLDER ...

Now INEXPENSIVE ELECTRIC LIGHT AND POWER for your home!

Johnson CHORE-HORSE

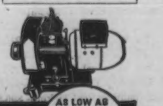

Brilliant ELECTRIC LIGHT for house and barns, dependable POWER for pumping water, charging batteries and hand-powered machines. Do away with dangerous, old style lamps and lanterns, have the convenience of modern lighting.

Johnson Chore-Horse models are compact, precision-built, light in weight and portable. Models range in capacity from 150 watts to 800 watts (from 6 to 32 25-watt lamps may be used at one time). Prices are extremely low, from $69.50, all taxes included.

New illustrated folder containing all information on construction, capacities, prices and the many uses about the home, including the Johnson Water-Pump, is available FREE on request. Send coupon for your copy today, and see how easy and inexpensive it is to have full enjoyment from electric power supplied by the new, improved, portable, Johnson Chore-Horse.

Motor Car Development

In Early Days Few People Foresaw The Future Of The Industry

W. G. Robertson, secretary-treasurer of the Canadian Automobile association, asserted in a speech at the Canadian Good Roads association convention that few in the early days foresaw the future of the "horseless carriage." The British Association for the Advancement of Science concluded at its 1896 session that such vehicles could never be widely used because their operation would require too much skill and their drivers would not have "the advantage of the intelligence of the horse in sharing his path."

W. B. Hutchison, of Ontario highways department, said the experience in Ontario has been that when a loose gravel or stone road had to carry traffic in excess of 500 vehicles per day the maintenance charges per mile per year were excessive and it was practically impossible to keep the surface in a standard serviceable condition. Advantages of transforming such roads to a more permanent type of dustless surface were fairly obvious.

Stop Poultry Fights

Red Goggles Make White Leghorn Hens More Peaceable

The mystifying spectacle of 3,000 white Leghorn chickens at the Essex County Penitentiary's poultry farm in North Caldwell, N.J., wearing red goggles was explained by Warden Floyd Hamma, who said the rose-colored glasses had stopped fighting which had resulted in the death of 10 per cent. of his Leghorns in a year.

Guards in charge of the poultry farm found a harmless peck causing a slight scratch immediately was transformed into a death fight by the sight of blood.

If the chickens saw red all the time, the keepers thought, this felonious tendency might be curbed. They devised goggles of a small strip of leather fitted with red isinglass and wired to the beak. Since the goggles were put into use there has not been a fatal fighting among the Leghorns.

The ancestral family of Benjamin Franklin had been blacksmiths for more than 200 years.

Raymond Massey In New Role

A Canadian Representing Abraham Lincoln, Brings Comments From New York Newspaper

Prospect of a Canadian actor playing the role of Abraham Lincoln on a New York stage was too much for the tabloid Daily News.

The News, worked up over the idea of a British subject playing such a "thoroughly American" part as the great emancipator, shoved the subject of international affairs to the tail end of its single editorial column and gave over the leader space to discuss the question: "A Canadian as Abraham Lincoln?"

Prompting the editorial was the much-heralded performance of Raymond Massey of Toronto in Robert E. Sherwood's "Abraham Lincoln in Illinois," scheduled to open early in the new theatre season.

Sherwood himself picked Massey for the part. The News thinks Massey as an actor is "fine" and "he certainly does look like Lincoln." But it finds the nationality angle a big hurdle.

"We think he is going to stumble over something. In the subconscious minds of those who watch him, unable to unify the actor with his part, there is bound to be this question: 'Why in the world should a Canadian (you might say an Englishman, in view of his years of experience on the British stage) play the part of so thorough an American as Lincoln?'"

Cows Might Object

If you don't like carrots or cod liver oil, perhaps you can interest Bossy in eating them for you. Experts at the U.S. National Agricultural Research Centre said that carrots and cod liver oil, mixed with poor hay in the bovine diet, would increase the vitamin A content of milk. With good hay, the experts added, they weren't necessary.

A Red Cross doctor says that from 70 to 80 per cent. of those treated in the Chinese war zone are women and children, and hospitals are the favorite targets of bombers. That's modern warfare.

With the exception that the molecules are arranged differently, diamonds are of the same material as the soot of a lamp chimney, or the lead of a pencil.

Most Valuable Cargo

In An Emergency Captain Thinks Of Passengers First

When the Cunard White Star liner Aquitania arrived in New York from Southampton recently, says the St. Thomas Times-Journal, there was a consignment of 380 boxes of goods to which the stevedores no doubt gave a good deal of careful attention. The stuff inside the boxes was gold —$21,000,000 worth.

Passenger liners do not carry much general cargo in their holds. They stow away baggage, "Not Wanted on the Voyage," automobiles and some express packages, but they don't take messy stuff like flour, barrels of oil, rope or any of the other miscellaneous articles that you can see being lowered into freight ships and lashed to the deck when the holds are full. In fact, the decks of a liner are almost as neat and clean as the floor of a bride's home.

And yet those liners carry more valuable cargo than any freighter that leaves port. Invariably they carry gold, either way, and in addition to probably 1,000 to 2,000 passengers or more, who are, after all, the most valuable part of the cargo, there is all the baggage of those people including expensive clothes, jewels and articles purchased during their trips abroad. Always the value of everything carried on a voyage must run into many millions of dollars. When there is a substantial consignment of gold the cargo is often more valuable than the ship itself.

One might think that the captain of a gold carrying ship would be worried night and day until his ship docked and the gold was removed from his care. But the captain probably does not worry about it at all. He knows the metal is stowed in a strong room and that the stout ship beneath his feet will not founder and he is not afraid of meeting hi-jackers or pirates on the way across. The 380 kegs of gold in the Aquitania did not cause the master any more worry than if they had been 380 kegs of butter.

And yet, if the ship was in danger of sinking, his first thought would be, not for the $21,000,000 but for the passengers.

Greater Interest In Music

...t Displayed By All Nations, Peace Would Be Assured

Sir Ernest MacMillan, head of the Toronto Conservatory of Music, urges Canada to "stand on her own feet in the music world. No longer should she depend on the United States for musical nourishment any more than she should for defence, Sir Ernest said.

Support for music, financially and otherwise, was relatively small, he added. In laying foundations for future development of the nation the "unifying, civilizing and peace-making" power of music should not be forgotten.

"If the various nations today would take of a little time from their feverish armament preparations and learn some of each other's songs they would find themselves nearer to peace than all the disarmament conference and non-aggression pacts are ever likely to bring them," Sir Ernest believed.

Competition At Gretna Green

Woman Has Gone Into Marrying Business At Famous Village

The two established 'anvil priests' at Gretna Green now have feminine competition. Mrs. Jessie Graham, 79, who says she was the original "anvil priestess" in Gretna, has gone back to work after 30 years of retirement. Gretna is a village across the English border in Scotland, where marriage can be effected by a simple "declaration before witnesses." For more than a century it has been the custom to make the declaration before a blacksmith, hence the anvil used by non-blacksmith "priests." A recent increase in the number of runaway marriages caused Mrs. Graham's decision. "I think the time is ripe for a comeback," she said. "I might as well have a share of what's going as anybody else."

Defective Brakes

Of 8,114 Manitoba motor vehicles tested in Manitoba operated safety lanes during 1938, 4,897 or more than 60 per cent. failed to reach a reasonable condition of safety, the provincial accident and prevention bureau reported. Of these 38 per cent. had defective brakes.

"In the event of a hostile air raid," says a writer, "some of the public statues would be the first things to suffer."

Even so, we're still in favor of peace.

A shortage of native labor is handicapping mining in South Africa.

Prison Reform

Will Abolish Some Of Britain's Most Famous Jails

Some of Great Britain's most famous prisons will be abolished under sweeping reforms announced by Home Secretary Sir Samuel Hoare in the House of Commons.

Pentonville prison in North London, from which prisoners were prepared for transportation half way through last century, is to be turned into a housing site. This prison was opened in 1842, occupies an area of ten acres and cost $450,000 to build. In its burial ground are the graves of Crippen, Dr. Roger Casement and others executed in the prison since 1867.

The jail at Reading is to be pulled down to improve the amenities of the town. Oxford prison is to make way for the new Nuffield College of Medicine, and Holloway prison is to go out of use as a women's jail. It will house men temporarily, and the women will be moved into a new prison "camp" in the country.

The reforms announced by the home secretary have come as the result of a ceaseless campaign waged for many years.

"We have had a housing program for the people, and we should now have a housing program for prisoners," Sir Samuel said. "I am glad to say that we have formed at the home office for the first time in the whole history of prison administration in this country a program for the future."

Probably the most interesting reform concerns the women's prison at Holloway, built on the model of Windsor castle, with great walls round it. Sir Samuel said that nothing could be more unsuited as a prison for women than Holloway, and in its place will come the "camp" in the country where the women will live in little communities, helping themselves and each other back to normal conduct. The most difficult class of women prisoners are the habitual drinkers. They make a habit of going into prison on a Monday on a five-day sentence, coming out on Friday—and going back the following Monday. Some of them, when they leave, cry "Keep my room for me next week."

Two more important reforms for women are food and clothes. "It adds tremendously to the self-respect of a woman prisoner if she feels she is not looking a guy and that her clothes fit her," Sir Samuel said.

Food—and this applies to men as well as women—will, if the present experiments succeed, be served in hot containers which the prisoners themselves will collect from the prisons.

In addition such privileges as the prisoners now possess will be extended—smoking in prisons, wages for good work and exercises for physical fitness.

No Longer Needed

London's Blue Air Mail Posting Boxes To Disappear

Coming Events in Britain says the blue air mail posting boxes, which have been a familiar sight in the streets of London and the large provincial towns since 1930, are to disappear. In their early days they served to popularize facilities for sending by air urgent letters, marked with a blue air mail label, to certain overseas countries, on payment of a special air mail fee in addition to the ordinary postage.

But the carriage of mails by air has become so normal a feature of postal operation, that posting in the blue air mail boxes of correspondence for countries served on the "all-up" basis, so far from being a convenience to the Post Office and an advantage to the posters, has become a source of potential delay.

When the first blue posting box was introduced, air mail letters were being despatched from this country at the rate of about 40 tons a year. By 1935 this figure had increased to nearly 200 tons a year. It is now in the region of 2,000 tons. Extensions are in prospect that will bring it to 2,200 tons.

More Ships To Salvage

There are still four German battleships and four cruisers at the bottom of the ocean at Scapa Flow where their German crews sank them after the surrender of their fleet to the British. But the Britons are slowly recovering them, one by one, for the sake of their scrap metal.

The number of plants in Canada reporting the production of processed cheese in 1937 was 19, distributed by provinces as follows: Ontario 11, Quebec 6, Manitoba 1, and Alberta 1.

The planet Neptune, far from the sun's warmth, has a temperature of about 400 degrees below zero Fahrenheit.

TELEVISING A FASHION PARADE

Television is rapidly becoming a commercial success as demonstrated by this view taken at "Radiolympia", the wireless trade's show at Olympia, London. A parade of fashions in leather is shown being televised. The models are wearing gowns and hats entirely made from leather and are a forecast of Winter and Spring modes.

New Butter Method

Vacreation Process Used In Many New Zealand Factories

Some years ago a buttermaker in New Zealand struck on a new idea in the manufacture of butter. It consisted of churning the cream and handling the butter under a partial vacuum. There must have been merit in the idea, for a large proportion of New Zealand butter is now being made under this "Vacreation" process, and its inventor is now in the United States demonstrating its advantages.

In New Zealand every factory in Auckland province now employs vacreation in making butter, also quite a number of machine operate in the southern districts. Approximately 75 per cent. of the Dominion's total butter output is now made with the new method.

The greatest advantage is in the extraction of feed flavors. An outstanding example of this is a small factory which last season, using pasteurizers, made only second grade butter. This season to date, using the tandem vacreator, the product is grading finest consistently. This remarkable improvement in quality is mainly due to the removal of feed flavors, and means a considerable financial gain to the company.

Vitamin "K" Isolated

Complete isolation of vitamin "K" —diet factor necessary for coagulation of blood—was announced by Dr. Edward A. Doisy, St. Louis University research chemist. Dr. Doisy said the transparent and colorless crystals of pure vitamin were obtained from an alfalfa meal oil. He was previously known for his isolation of theelin, female sex hormone.

The average life span of a tortoise is approximately a hundred years.

According to estimates, 1,000,000 tons of steel are nickel plated annually in the United States.

Twenty thousand tons of currants were produced in Australia this year.

Likes Her Sun Glasses

Boston Bull Terrier Always Wears Them On Motor Trips

An impudent-faced Boston bull terrier wearing tiny sun glasses, with its head stuck out of the window of an otuomobile carrying New York state license plates, was the novel sight that attracted the attention of pedestrians in an Ontario city. The little dog blinked at pedestrians who stopped to look at it, through the amber glasses. The owner of the dog and car explained that the dog recently had an operation on its right eye and in order to prevent the dog from rubbing the injured optic, the veterinarian recommended the glasses. The dog soon became accustomed to wearing the glasses, the owner stated, and was not satisfied to go on a motor trip without them. "She likes to stick her head out of the window while we're traveling and the wind hurts her weak eye if she hasn't got her glasses on," he explained. The glasses were kept on the dog's head by a metal wire around its neck to which the ear hooks were fastened.

"I don't think that dog will ever be satisfied without glasses, now that she has worn them so much," the owner stated.

Ocean Rates On Hay

There never have been any imports of hay and straw into Switzerland from Canada. The ocean freight rate makes business in these commodities practically impossible. Recently, however, enquiries have been made from Swiss importers to the Canadian Trade Commissioner at Rotterdam, Holland, but the comparatively low price offered could not be entertained.

Has Unique Record

Twenty-five years as an airplane pilot is the record which has just been achieved by Captain F. Dismore, one of the veteran pilots of Imperial Airways, and as a record of sheer continuous flying, in all types of aircraft from the earliest day to the present time, it is reckoned to be unique in the annals of the air.

Right Kind Of Pride

Young Husband Did Washing To Keep Family Off Relief

According to American custom, the washing of dishes and clothes in a home is definitely woman's work. Of course many a good husband will occasionally "pitch in and help with the dishes," and in the old days a husband would give his wife a hand at emptying wash-tub full of water. But a man who did the dishes or the washing habitually was considered to be just plain hen-pecked.

Over in Milwaukee a twenty-five-year-old husband lost his job. Soon after, his second daughter was born.

The young man's situation was desperate, but not so desperate that he was ready to accept welfare relief. Instead, he took stock and decided that he could wash clothes for a living. He canvassed his neighborhood, got some customers, rolled up his sleeves and went to work at the washtub.

Maybe he had to put his pride in his pocket, but not to the degree of going on relief.

Actually he has every right to be proud of the fact that by his own efforts he is keeping his home together and supporting his family in the spirit of initiative and independence.—Detroit Free Press.

Grandma Was Right

Grandma was right when she insisted that onions would help cure a cold. E. F. Kobman, of Camden, N.J., who has been studying the aroma of onions, told the American Chemical Society it contains an aldehyde which is a strong destroyer of bacteria.

Dead Line For Roosters

It's against the law for roosters to crow at night in Salem, Va. The city council, annoyed by a particularly raucous-voiced fowl, outlawed such crowing as a public nuisance. Owners of lawbreaking roosters are subject to a $25 fine and 10 days in jail.

Beeches chestnuts and oaks all belong to the beech family.

Economic Services

Research Work Has Been Of Untold Assistance To The Farmer

Coincident with the International Conference of Agricultural Economists which was held recently at Macdonald College, Ste. Anne de Bellevue, near Montreal, an interesting article by Dr. J. F. Booth appeared in the August issue of the Economic Annalist on the origin and development of the Economic Division, Marketing Service, Dominion Department of Agriculture. The history of the Division of which Dr. Booth is the Chief, is practically the story of the advance of economics in the agricultural industry of Canada.

The change between the independent, self-sufficient farmer of pioneer days and the farmer of to-day who is dependant upon national and world markets for an outlet of his surplus products has forced on the farmer the need to study domestic and foreign trade international exchange, banking, credit, tariffs, transportation, prices and similar matters. Naturally this is beyond the powers of a single individual. Hence arose the newer economic service of the Dominion Department of Agriculture to assist the farmer.

The origin of the organization of the economic service, early research, agricultural co-operation, farm management and land economics, survey of dairy farms, marketing, taxation, credit, research problems, and the service dealing with the agricultural situation and outlook are effectively dealt with in Dr. Booth's article.

Reward For Good Drivers

Merit Plan Has Been Proposed By British Minister Of Transport

A scheme that seems to have merit, and the virtue of simplicity, has been proposed to the British Minister of Transport and is getting consideration.

It is suggested that all present motor-vehicle licenses, and all new ones to be issued, should be classed as "C" licenses. At the end of six months drivers whose records were free of accidents and serious traffic violations in that period would be given "B" licenses, presumably of a distinctive color. Another troublefree half-year would bring them "A" licenses, which would entitle the driver to cheaper insurance and to buy his license plates at a reduced cost.

The driver would hold his "A" markers only so long as he kept his record clean. If he was responsible for an accident he would go back to the "B" class, and for the second offence he would join the "C's". For drivers who are accident-addicts a "D" class would be provided, to be reached by three spots of trouble in 18 months, and four accidents in two years would bring suspension of driving privileges.

Much could be said, we think, in favor of such a scheme. The right to carry Class "A" markers would be the sign of a careful and competent driver and something for which most drivers would strive. Once earned, the distinction would be worth the keeping, and is cheaper insurance than a cash reward for safe driving.—Ottawa Journal

Attracts Much Attention

Hand-Made Chair Carved From Peculiarly Formed Cedar Tree

In the lobby of a hotel at Edmundston, N.B., a hand-made chair fashioned from a peculiarly formed cedar tree attracts attention of visitors. A wealthy big game hunter from the United States once offered $700 for it, but the owner refused.

Solomon Levesque, a Campbellton carpenter, made the chair 20 years ago, carving it from a huge bulge formed on the side of a cedar after sap stopped flowing evenly through the tree.

Levesque sold the unique chair to J. L. Boudreau, then proprietor of a Campbellton hotel. It was Boudreau who refused the offer of $700. Later, when times became more difficult, he accepted $50 from the owner of an Edmundston hotel, where the chair remains. Another United States visitor wanted to buy it for $300, but the local hotelman, like Boudreau, declined to sell.

Big Sum For Decorations

Mitchell, S.D., pays $10,000 a year to redecorate the unusual interior of its $275,000 "Corn Palace." Walls of the vast auditorium are lined with murals of native corn, grains and grasses, woven into spectacular designs by skilled decorators every fall.

The bamboo plant has been known to grow 16 inches in one day, and reaches a height of 116 feet.

Land crabs crawl out of their holes and steal golf balls on the golf courses near Sydney, Australia.

SOUTH AFRICAN CENTENARY CELEBRATION OF GREAT TREK

One hundred years ago large parties of Voortrekkers left "The Cape" to find a new home inland and founded what is now Natal. To commemorate this trek, two Voortrekker wagons, drawn by red Afrikander oxen, left Capetown for Pretoria, 1,001 miles distant and upon their arrival a memorial was unveiled. Our picture shows one of the wagons passing through Kloof Pass, 50 miles from Capetown, making better time than its predecessors of a century ago when there were no roads.

YOUR COUNTRY NEEDS YOU

Perhaps you shrink from these words; and who can blame you? They recall all too vividly the patriotic fervor of a nation in arms and the epilogue of horror and heartbreak. But, although the call is more urgent for your help in a crisis, your country needs you just as surely in the cause of peace and progress. If you and your neighbors are prosperous, your country prospers. If you and your neighbors are well informed and progressive, the whole country reaps the benefit.

Greater progress, higher standards of living, better ways of life, are possible to an informed people. It is your privilege to be informed fully on all matters of importance through a free press. Make full use of this freedom, denied in so many other countries. Be informed. Keep a voice in your own government.

Improved Driving Practices Necessary For Reduction Of Automobile Accident Rate

Reduction of the automobile accident rate depended mostly on improved driving practices and attitude and law enforcement must be directed primarily to that end, Howard M. Baker, traffic engineer of Montreal police department, said at the annual convention of the Canadian Good Roads Association. He urged uniformity of traffic laws in general and speed laws in particular.

Although reckless, inefficient or drunken driving was a factor in causing accidents, Mr. Baker said the vast majority of persons involved in accidents were honest, law-abiding citizens, driving competently and with reasonable caution. They were chargeable at worst with bad judgment rather than a fixed intent to jeopardize themselves.

Enforcement inflicted in a spirit of revenge defeated its own end and wronged the community. It should seek to correct and educate. Suspensions and revocations of licenses had a greater deterrent effect on erring drivers than almost any other punitive measure.

Convictions always should be followed by punishment but the penalties should be neither unusual nor unreasonable. Impartial, continuous and efficient enforcement would inevitably decrease the accident rate.

"Where the human element is involved there is no such thing as absolute control," said J. B. Bickell, Ontario registrar of motor vehicles. No amount of education or regulation would make every individual act according to a set pattern.

The Ontario minister of highways had power to suspend or revoke licenses on conviction for speeding or recklessness causing accident, racing, drunk driving and any criminal offence involving use of a motor car. This power has been exercised almost 30,000 times in eight years.

Co-operation of the Ontario health department is enlisted to prevent issuing of licenses to epileptics or mentally irresponsible persons, while a close check is kept on physically incapacitated applicants.

Operate Large Farm

Colonization Finance Corporation Control Large Holdings

Probably few people are aware that Winnipeg is the headquarters of the largest farm management and service company in the world, said Louis L. Laing of Galt, Ont., president of the Colonization Finance Corporation of Canada, Limited, who arrived to begin a western tour of inspection of farms supervised by farm managers of the corporation.

The Colonization Finance Corporation and the Canada Colonization Association, a subsidiary of the Canadian Pacific Railway under the same general management, are closely associated and have under supervision some 4,000 farms in the three prairie provinces totalling 1,370,000 acres.

"Our distribution of Thatcher, Renown and other rust resistant wheats during the last few years was one of the important services we rendered to our farmers and members," said Mr. Lang. "This year 95 per cent. of the company lands are sown to rust-resistant wheats, the yield averaging 25 bushels to the acre on No. 2 Northern. Ordinary wheats would undoubtedly have reduced the yield to 10 bushels."

Improving On Nature

High-Speed Machines Now Take Fuzz Off Peaches

Uncle Sam is putting up the money to take the "fur" off Georgia peaches.

High-speed de-furring machines run with electricity furnished by a rural power co-operative financed with a loan from the Rural Electrification Administration are now in operation in Upson County.

The peaches are spun about the rollers while in contact with brushes with just the right pressure to take off the fuzz and make them more attractive and palatable to eat fresh, it is explained.

Immune To Diseases

Negroes are reputedly immune to yellow fever, the Japanese almost never contract scarlet fever, Mexicans never catch a bad case of smallpox, and the Eskimos are immune to scores of diseases in their native habitat, but readily contract them in warmer climates.

Japan's trade with the rest of the world dropped 18 per cent. in the last 12 months.

Radio is a new and noisy method of letting peddlers into your home.

Increase In Meat Exports

Total Value To Canada Last Fiscal Year Was $41,365,000

Canada's export trade in meats is one of the most active branches of the external commerce of the Dominion. In the last fiscal year there was a gain in value of over 14 per cent., and this followed a steady upward trend over six years in which its value has been multiplied fivefold. The greater part of these exports are shipped to the United Kingdom, and the increase in this branch of the trade last year was 15 per cent. At the same time meat exports to the United States likewise showed a considerable advance.

Four-fifths of the export value last year was in bacon and hams, which increased nearly 16 per cent. Increases in exports were reported last year in nearly all other kinds of meats as well.

Exports of meats from Canada in the last fiscal year, which ended with March, had a total value of $41,365,000. In the previous fiscal year the value was $36,114,000. In the fiscal year ended in March, 1933, the total value of these exports was only $6,683,000. Of the total exports in the last fiscal year the United Kingdom took $36,159,000.

Exports of meats to the United States were valued at $3,271,000. Fresh pork is the item in which trade with the United States plays the largest role in meat exports. In the last fiscal year the total exports of fresh pork were $2,290,000, of which $2,077,000 was shipped to the United States and only $151,000 to the United Kingdom.

New Type Of Mattress

Eighty-Five Per Cent. Air And Fifteen Per Cent. Rubber

A new and entirely different type of mattress was announced recently.

This new mattress is formed of sponge rubber made of latex, the milk of the rubber tree, whipped to a foam and vulcanized in a single piece. It is made in bed sizes, is about five inches thick, and for additional springiness and ventilation is pierced by finger-sized holes in an all-over pattern. The sleep cushion is actually about 85 per cent. air and 15 per cent. pure rubber, so that it weighs only about half as much as the ordinary mattress.

This new type of material eliminates padding, springs, wires, tufts, or buttons, and has a perfectly smooth surface. A cloth cover fits smoothly over the cushion. Since the material used is much softer than the body, the mattress conforms perfectly to all sleeping positions, shaping itself to every contour. When compressed, its tiny air cells release their air and then fill again as the pressure is changed or lifted, so that the mattress virtually "breathes."—Scientific American.

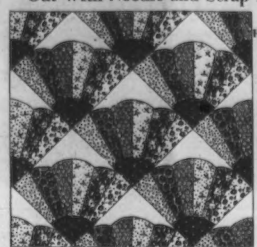

Flax And Flaxseed

Highest yields of flax per acre are obtained in France, Belgium and Northern Ireland, where the industry is an old established one. Much of the output in Northern Ireland may be said to be of Canadian origin, the pedigree flaxseed grown in Canada and exported to Ireland being much in demand in that country. In Canada, an excellent quality of flaxseed is grown for all purposes.

A cat, a rook and a young brown owl have become pals in Brighouse, England.

Sound travels 11 times as fast in copper as in air.

Easy Patches Form Striking Quilt

Grandmother's Fan

PATTERN 6125

Here's an old-fashioned quilt, "Grandmother's Fan" that even a beginner can make to perfection; it's so easy to piece. A fascinating way to use odds and ends of bright cotton prints. Pattern 6125 contains the Block Chart; carefully drawn pattern pieces; directions for cutting, sewing and finishing; yardage chart; illustration of quilt.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

New Use For Wheat

Chemists May Solve The Problem Of Marketing Grain

A few years ago, when Canada was greatly worried by a 225 million bushel wheat surplus, the Financial Post asked Henry Ford what he would do with the wheat surplus if he had it.

He replied that he would set half a dozen chemists to work to find out what wheat really was; what it could be used for other than making flour.

Mr. Ford then saw clearly what other wise men are only now beginning to see, that Canada may ultimately have to solve the markets problem of its western prairies by research work to find new uses for a wheat crop that some years—this year, for instance—is bigger than the apparent market.

International Nickel Co. has created new markets for nickel and made itself prosperous. Our pulp producers have found new markets for cellulose and lifted themselves out of the slough of depression. The same can be done with wheat.

Corn has set an example. Corn is now being used for at least 20 industrial purposes.—Financial Post.

Alfalfa Seed Crop

Has Shown Heavy Increase In Prairie Provinces During Past Few Years

It is yet too early to estimate the total yield of the alfalfa seed crop in Canada for this year, states the Plant Products Division, Dominion Department of Agriculture. A great deal will depend on the setting of seed of the second crop of alfalfa in Ontario where most of the seed is grown in Canada. The first crop in Ontario failed to set seed, but it is hoped that the second crop will turn out better. The second crop has bloomed well under variable weather conditions for seed setting.

The alfalfa seed crop in the Prairie Provinces has increased remarkably in the last few years. The estimated crop this year is 2½ million pounds as compared with 1¾ million pounds in 1937. This is due to an increased acreage. It is mostly of the Grimm, Cossack and Ladak strains. The western crop will, therefore, furnish a fine supply of seed for the rest of Canada even if the Ontario crop is light, which is likely from present appearances.

The Government has ordered an expedition into the Central Australian desert to examine skeletons believed to be those of the explorer-geologist, Ludwig Leichhardt, and his party, lost 90 years ago.

Large Space For Recreation

The Queen Elizabeth Is Truly A "Keep Fit" Ship

From the point of view of the operating company and of those who will use the ship, the passenger accommodation is of first importance, and in this respect the Queen Elizabeth will far eclipse anything hitherto seen.

By cutting down the number of funnels a huge amount of space has been saved on the liner's 14 decks. Much of this space will be given over to games and recreation.

The Queen Elizabeth will be a "keep fit" ship on an unprecedented scale. Not only will there be a gymnasium, swimming pool, and baths of various kinds for cabin passengers, but there will also be a gymnasium and pool for tourist passengers, and a gymnasium for third-class travellers.

In addition, there will be the vast sports deck available to all classes, and the spacious "playing fields" laid out on the terraced decks at the after end of the vessel.

Another innovation is the introduction of a "restaurant deck," on which will be installed special restaurants for all classes of passengers.

There will be no fewer than 29 public rooms available for the ship's floating population, many of which will be equipped with the most up-to-date air conditioning plant.

Cocktail bars, little restaurants, and lounges of all kinds will be scattered throughout the ship.—News of the World.

Not An Uncommon Sight

Observation Has Proved Ants Venerate And Bury Their Dead

A story in "Our Dumb Animals" says an ant funeral is not uncommon in many ant communities. That they venerate their dead and observe funeral rites has been proved by actual observation. They go about this business of burying their dead in an orderly fashion. They have been known to form processions and march by twos, a dead body being carried by two; at intervals the two laden ants stopping to be relieved of their burden by the two walking next in line. A procession of this kind is sometimes followed by an irregular body of ants. Upon reaching the spot selected as a burial ground, they immediately begun digging holes in the ground, into each of which an ant is laid. All graves are filled before the return home is made.

The sacred pagodas of Burma, China and India always are from three to 13 stories high, but never have an even number of stories.

GERMANY'S BIGGEST GUNS — AS SEEN IN NAZI PAPERS

Although press despatches told of confiscation of pictures of Germany's biggest guns, newspapers in Berlin were permitted to use this photograph. This giant gun has a barrel 25 feet in length and has a range of about 30 miles, reminiscent of the "Big Bertha" which shelled Paris during the World War, firing shells a distance of 75 miles.

Plans Are Made For More Extensive Use Of Rust Resistant Wheat In West

Prairie agriculturists are planning for the 1939 wheat crop even before completion of this year's harvest. The program aims at more extensive seeding of rust-resistant wheat, a determined anti-grasshopper campaign and widespread prairie farm rehabilitation administration activities.

One of the most important factors in ensuring a good crop next year lies in seeding rust-resistant wheat in areas susceptible to rust. Alberta was not affected materially by rust this year, but in Manitoba and more particularly Saskatchewan the damage was considerable, although accurate figures are not available.

Rust-resistant wheats, Thatcher, Apex and Renown, were used extensively in Saskatchewan this year for the first time, seeding some 2,000,000 acres of the estimated 13,900,000 acres in wheat. Production was estimated at 30,000,000 bushels.

Value of the new varieties is indicated in the Saskatchewan wheat pool estimate of average yields per acre in the province: Rust-resistant, 17.4 bushels; other bread wheats, 10.2 bushels; Durums, 12.3 bushels.

Total production of some 60,000,000 bushels of rust-resistant wheat in the prairie provinces ensures an adequate supply for seed next year for the first time. Authorities estimate 12,500,000 bushels will be required to seed the affected areas, 2,000,000 acres in Manitoba and 9,000,000 acres in Saskatchewan.

Provincial governments are formulating plans for distribution of seed and already the Canadian wheat board has authorized elevator companies to exchange rust-resistant varieties for non-resistant grain at wheat board prices. Last year Thatcher sold for seed at a premium, farmers generally paying $1.50 a bushel.

Prof. Manley Champlin of University of Saskatchewan, who helped develop Apex wheat, says experts generally expect 1939 will be the first year the rust menace will not be felt to any great extent in western Canada. He says production of a rust form virile enough to affect resistant wheats is a remote possibility.

Unofficial estimates place grasshopper damage, largely in Saskatchewan at from 10,000,000 to 30,000,000 bushels this year.

Proposals for an international anti-grasshopper campaign are supported by Hon. J. G. Taggart, Saskatchewan minister of agriculture, and K. M. King, Dominion entomologist, at Saskatoon.

The prairie farm rehabilitation administration program includes promotion of farming systems that will afford greater economic security, water development for fullest utilization of surface water and land utilization where areas of inferior soil are being removed from crop production and community pastures established.

Forty-seven district experimental sub-stations are demonstrating and testing methods of utilizing moisture and controlling soil drift. There are 100 district associations with 14,000 members. Tree planting and re-grassing are in the program.

Water development includes engineering and financial assistance to individuals and communities. George Spence, P.F.R.A. director, estimates that by the end of 1938 more than 7,000 individual dugouts, stock watering and irrigation dams will be completed in the three prairie provinces.

Large projects completed or under construction will provide irrigation of some 125,000 acres in Alberta and Saskatchewan.

Mr. Spence said there were some 60,000,000 acres of land within the open plains area of the three prairie provinces, 95 per cent. of which was either marginal or non-arable. It was the intention under the P.F.R.A. plan to in time remove from cultivation a large portion of these marginal and non-arable lands and turn them back to grazing through the establishment of community pastures and reserve areas.

These pastures will be administered for the benefit of the remaining adjacent settlers, who, by reason of a combination of better lands and the use of these pastures and water development to enable them to grow winter feed, will be rehabilitated and permanently established.

High Or Low Grade Honey

Greatest Care Should Be Taken In Extracting Honey

Honey, to the chemist, is essentially a highly concentrated sugar solution. To the consumer honey is a delicious food direct from nature. It contains, besides the highly nutritive sugars, many other elements essential to the human body.

Since most honey is marketed in the extracted form, unchanged in composition, it is of many different shades of colour and has a great variety of flavours. Honey also varies in moisture content depending, to a certain extent, on the weather conditions during the nectar gathering period. The length of time the honey is allowed to remain on the hive before extracting has also a bearing on the density, therefore, the papers should not be removed for extracting until the combs are at least three-quarters capped. During extracting, care should be taken to avoid the honey becoming spoiled in any way.

This may happen by the absorption of moisture from the air, so that the drier the honey house the better. Steam should not be allowed to escape into the air of the extracting room and the windows should be kept closed during damp or rainy weather. Even capped or comb honey stored in a damp place will absorb moisture from the air.

Honey should be heated only sufficiently to facilitate straining, if, indeed, heating is necessary. The volatile oils which are present in infinitely small quantities are driven off at 160°F.

It is these oils which give honey its fine aroma and flavor, therefore, excessive heat should be avoided.

The texture of granulated honey depends largely on its treatment while in the liquid state. Granulation is retarded by heating and the quicker the granulation the more uniformly smooth the final product. Therefore, after extracting honey should be stored in a cool, dry place.

Cleanliness in handling honey cannot be emphasized too much. Honey readily absorbs odours under careless handling, and while the grading regulations attempt to ensure the consumer that he is getting a quality product, only the carefulness of the producer can give him honey at its best. The delightful flavour and aroma of fresh honey should accompany it to the consumer's table. The apiarist who wants to do this will produce high grade honey, states Wm. A. Stephen, of the Bee Division, Dominion Department of Agriculture.

Makes Map Of Moon

Welsh Engineer Has Been Working For Four Years On Job

For four years H. Percy Wilkins, Welsh engineer, has been engaged on one of the world's biggest mapping jobs, and he is only half finished.

For amusement Wilkins is working on a 25-foot map of the moon.

Among mountain peaks some of them which are higher than Everest, astronomers have spotted dark patches which move along the moon's face.

"Personally, I think they are some form of fungus in the damp spots," says Wilkins. "There are things that lead me to believe there are traces of moisture and some slight atmosphere on the surface of the moon. Life, maybe, but human life, definitely not."

Knew Her Bible

A country school was visited by one of the Governors a man with a pompous air. He put some questions, and one of them was, "What is the Sixth Commandment?"

When no one answered he tried again.

"Come, what Commandment did Cain break when he killed Abel? Who can tell me?"

One scholar beckoned to the teacher and whispered something to her. The visitor demanded to know what the child had said, and the teacher quietly replied:

"The child simply said that there were no Commandments when Cain killed Abel."

Canada's Leading Exports

Newsprint worth $126½ million was Canada's greatest item of 1937 export, while wheat ranked second at $124½ million. Third place was held by gold bullion at $105¾ million, and fourth by nickel at $59 million. Meat was the seventh most important item, with a total export value of over $42 million. 2273

A Very Old Bowl

Museum experts and historians in Vancouver are studying a carved green jadite bowl believed used by a "medicine man" in the camp of a primitive people who inhabited British Columbia's Fraser Valley farming district 3,000 years ago.

Daily use of Wrigley's Spearmint sweetens the breath

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using healthful Wrigley's Gum daily—*at millions do.* The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today.—adv

WORLD HAPPENINGS BRIEFLY TOLD

The will of Daniel G. Dodge, filed at Pontiac, Mich., for probate, left $250,000 to his widow, the former Laurine McDonald.

Officials of the Montreal Chinese Patriotic Society announced $5,000 had been raised for relief of Chinese war refugees in a charitable campaign.

General Malin Craig, United States army chief of staff, said the army has developed new anti-tank guns, which would wipe out an enemy tank offensive.

Canada is one of the three leading flour-exporting countries of the world. It ranks second to Australia, while the United States is in fourth place.

The estate of Robert P. Scripps, publisher, who died last winter, was valued at $3,033,567 in an appraisement on file.

Sir Henry Page Croft, Conservative member of parliament, returned to London from a survey of immigration prospects in Canada, hopeful of the possibility of settlement of Britons in British Columbia.

Dominion government employees in Ottawa number 12,845 and their annual salaries amount to $20,000,000, according to a survey recently completed by the finance department.

A decree signed by King Vittorio Emanuele and Premier Benito Mussolini placed in effect the cabinet decision of Sept. 1 to expel foreign Jews who have settled in Italy since Jan. 1, 1919.

Wheat fed, or to be fed, to livestock and poultry in Canada during the 1937-38 crop season has been estimated preliminary as 18,938,000 bushels, as compared with 15,794,000 bushels in the 1936-37 season.

Speaks From Experience

Trained Newspaper Man Says Germany Plans Constantly For War

Germany's every move, political, social and industrial, is toward preparation for the day when a national emergency may arise, G.B. Williams, motoring editor of the Daily Telegraph, Sydney, New South Wales, Australia, said when interviewed.

Sudeten Germans in Czechoslovakia are looked upon by most Germans as blood brothers ready for assimilation by Germany at the first opportunity. There is no question in the minds of Germans today, Mr. Williams states, but that Hitler plans to annex Sudeten territory whenever he feels the time is propitious.

Only recently out of Germany, where he represented the Royal Automobile Club of Australia at the International Automobile Conference in Berlin, Mr. Williams speaks from long experience as a trained newspaperman and observer. He was taken throughout the length and breadth of Germany and many of their transportation improvements, including the thousands of miles of what he describes as the most advanced public highways in existence today.

The people of Germany appear well fed, the Australian visitor explained. This, he said, was a surprise, as he had heard before his arrival in Germany that there was a shortage of food.

It is true, he explained, that they have their meatless, eggless and butterless days. On such days they are satisfied to use substitutes for these foods—substitutes that their bodies are being trained to assimilate as food for the day when it may be necessary to survive on them.

Abolition Of Honking

Disappearance Of Horns From Motor Cars Is Foreseen

The eventual disappearance of horns and horn-buttons from motor cars is foreseen by Public Safety, the magazine of the U.S. National Safety Council, which advocates abolition of honking, not only to increase the public comfort but the public safety as well. Virtually every place where horn-blowing has been abolished has seen a drop in accidents.

Italy has had anti-horn regulations for the longest time and is completely satiated with them. It is believed the privilege of honking will never be restored there. Anybody who uses his horn in traffic thereby brands himself (or herself) as a second-class (or worse) driver, says Miller McClintock, traffic expert, quoted by the magazine. A good driver in McClintock's opinion, analyzes the traffic ahead of him so no occasion will arise which will require his use of the horn.

Economical Cattle

Midget Cows Eat Less But Produce More Milk

Otto Gray of Stillwater, Okla., who started experimenting with an undersized breed two years ago, reported his pint-sized animals have surpassed other members of his herd in milk production although they consume only half as much feed.

The midgets were developed from an undersized Angus cow and a normal Hereford bull, stand from 30 to 37 inches high and weigh from 450 to 500 pounds.

The comic strip artists won't have to go far for material this autumn, what with those new coiffure styles and hat models.

SELECTED RECIPES

TART CRANBERRY SALAD

1 package Lemon Jell-O
½ cup sugar
1 pint hot water
2 cups raw cranberries
1 cup diced red apples

Dissolve Jell-O and sugar in hot water. Chill. Put cranberries through food chopper. When Jell-O is slightly thickened, fold in cranberries and apples. Turn into molds. Chill until firm. Unmold on crisp lettuce or romaine and serve with tart mayonnaise. Serves eight.

SHORTBREAD COOKIES

2 cups flour
½ cup St. Lawrence or Durham Corn Starch
½ cup icing sugar
1 teaspoon salt
1 cup soft butter
2 tablespoons cream
½ teaspoon vanilla

Cream butter, add sugar, add cream and vanilla, then dry ingredients well sifted together. Drop by teaspoons on greased cookie tins. Press down with tines of fork. Bake in a moderate oven 325 to 350 degrees F. until very light brown.

Many Will Agree

That Time Off To Recover From Holiday Is Essential

Legislation for human welfare will never be complete until it embraces provisions for compulsory rest cures for returned summer vacationists, says the Los Angeles Times. A man who aches all over from hauling big fish out of the water and whose imagination and tonsils are frayed from telling about the bigger ones that got away can't be expected to hit the ball the day he drags himself back to office, factory or store. A three weeks' rest after a two weeks' vacation would be just about right.

London's telephone clock "Tim," which gives the time to all who call up, earned $450,000 in tolls last year.

The Bank Of Canada

Is Under Full Ownership And Control Of Government

The Bank of Canada, which was nationalized by the Dominion Parliament during its last session, is the central bank of the Dominion. It was established by an act of Parliament in 1934 and began operations in March, 1935. At the outset it was privately owned, though the government controlled the appointment of the Governor. Two years ago the stock of the bank was increased and the government purchased a controlling share. Retiring the privately owned stock gives the government full ownership and control.

The Bank of Canada is the bankers' bank and the fiscal agent of the government. The commercial banking of the country is carried on by chartered banks, which operate under parliamentary charters and are supervised by a government-appointed Inspector-General of Banks.

The chartered banks are ten in number and have nearly 3,400 branches and sub-agencies, distributed throughout the provinces and territories of Canada. In addition, they operate 145 branches in some dozen other countries. The chartered banks have an enviable record for safety, no failure having taken place in the last 15 years.

France Will Use Buses

If It Is Necessary To Rush Troops From Paris

The "taxis of the Marne," which helped turn the tide of German invasion, 24 years ago, will be replaced with buses if the necessity of rushing troops from Paris ever arises again. The war ministry ordered the Paris Transport Company, owner of the capital's buses, to turn over a number of their regular city buses for use in army manoeuvres.

Jamaica's Hurricane Season

When Signal Shown Every Precaution Taken Against Storm

Almost any time in late August or early September you'll find West Indians scanning every cloud with a faint show of uneasiness. A cloudy sky at any time means something in this sunny Carribean district, but in the fall it may presage storms that sweep the islands bare of all but the strongest buildings and vegetation. It's hurricane season down there.

When the two red flags with blue checkers in the centre fly from signal stations, the somnolent populations spring into frenzied activity. What crops will stand it are hurriedly crowded into cellars. Livestock is crammed into the strongest outdwellings. storekeepers board their windows. Small boats are hauled up far out of reach of possible tidal waves. Larger ones are hurried into landlocked coves, moored with double lines with plenty of slack, and everything is cleaned off their decks.

But all too often the preparations are interrupted. First the birds stop singing, and all the tiny insect life hushes as a strange stillness pervades the atmosphere. The sun takes on a queery look. Suddenly the skies darken, then rain starts falling, gently at first, but increasing to incredible volume.

The wind strikes with the impact of a thunderclap. In an instant the air is filthy with flying dust and debris. Then it really starts to blow.

The hurricane differs from the tornado known in the southern United States in that it is an immense, revolving current of air which may cover an area of a thousand square miles. The tornado, which rarely is more than ten miles from edge to edge, sometimes moves with a greater velocity than the hurricane, but in scope and destructive ability it runs a poor second.

Judge Came To Rescue

Settled Case Between Debtor And Creditor In Satisfactory Way

Judge T. M. Costello conducted no successful a piece of arbitration between a debtor and creditor in division court at Goderich, Ont., that now he owns two cords of wood for which he paid $6.85—the amount involved in the debt argument.

"I can pay it in wood but I have no cash," the unnamed debtor told the proprietor of a baking establishment seeking payment of the debt.

"I can't pay my own accounts with wood," the baker replied. "I want cash."

Then the judge interposed: "Very well. Deliver to me the two cords of wood and I'll pay the money to the bakery."

The baker beamed thanks, the debtor grinned his pleasure.

Refused in an attempt to check a toothpick in a railway station, a Parisian lawyer sued the French government in 1907 and won after a 30-year court fight at a cost of 200,000 francs to the government.

Canadian Films

London Imperial Institute Wants More For Its Library

Sir Harry Lindsay, director of the Imperial Institute at London, England, appealed in an interview for more Canadian films for the institute's film library which illustrates industries, scenery and other aspects of British Empire countries.

Although Canadian films occupy the largest single section of the catalogue, Sir Harry hopes to obtain more films during his present visit to the Dominion.

Because demands of schools and societies for loan of films far exceed the supply, the institute has not dared to advertise the library's existence as the management knew wider publicity would merely swell the number of disappointed applicants, he said.

Afraid Even Of Flowers

Nazis Are Forbidden To Throw Bouquets At Hitler's Car

Germans were not permitted to throw flowers at the motor cars of Adolf Hitler or members of his entourage during the Nazi party rally at Nuremberg.

The organizing committee for the gathering decreed:

"Throwing of flowers at the Fuehrer's car or cars in his entourage is strictly forbidden, because of the danger arising therefrom for the cars' occupants. Storm Troop cordons must be fully respected. Advancing toward the Fuehrer's car is not permitted in any circumstances," as thereby serious accidents may be caused."

Geta, the traditional wooden footwear of Japan, are staging a phenomenal comeback because of the national economic stress.

"Quit Your Skidding" is the title of a new book issued by a tire company.

The earth travels about 1,600,000 miles a day on its journey around the sun.

COPYRIGHT-COURTNEY RYLEY COOPER • • • W.N.U. SERVICE

CHAPTER IV.—Continued

Kay Joyce, trim in polo shirt, fawn-colored breeches, riding boots and red nails of an equal lustre, leaned out.

"Jack!" she called. "Don't splash around like that. How in the world will you ever carry mother and me ashore? We'll be simply dripping, you old silly!"

It was Bruce Kenning, however, who finally carried Kay and her mother ashore. Hammond, all of a sudden, had realized that he was a sodden mess. Then, with the landing of the party, everything became confused; gold seekers crowded about, placer miners waded out to catch the rope which Timmy Moon had tossed to them, that they might knot it to a pontoon and anchor the ship. Now Hammond was back in his own cabin, talking excitedly as he changed his clothes.

"Kay's crazy about the cottage," he volunteered.

McKenzie Joe, squatted on the doorstep, turned his beaverlike head.

"I figured she would be, for awhile."

"What do you mean awhile?"

"They're city people," said McKenzie Joe quietly.

Hammond laughed, tightened his belt, stood immobile a moment, then clawed about him in the half-dark room for a necktie.

"Don't you worry about that. Kay can take it. So can her mother. They like the outdoors."

McKenzie made no direct reply. He only eyed his partner.

"Kind of strenuous, aren't you?"

"Well," said Jack with a grin. "You know—their first night here. We're all going to the Slumgullion to eat. Come along?"

"Nope." Joe said it half brusquely. "Little abrupt, aren't you, Joe?" he said at last.

"Not particularly."

A queer feeling of resentment shot though Hammond.

"Joe," he said finally, "what's been eating on you?"

"Nothin' but mosquitoes, I reckon."

"Let's not joke," the younger man said suddenly. "You've been different ever since we came back here."

"Me different? I ain't noticed it, Jack."

"You haven't seemed yourself. Moody—thinking about something all the time. Grouchy, like you had a chip on your shoulder."

"When?" asked Joe.

"The other day, for instance, when Bruce Kenning dropped by our test pit."

"He was asking a lot of questions, wasn't he?"

Hammond spread his hands.

"Oh, Joe—suppose he was? Can't a man be interested in what a friend's doing? You'd think he was going to jump our claims, the way you act."

"That wouldn't do' him much good," the old prospector said, with a masked smile. "Not the way they're turning out."

"Then why be so cagey? We haven't got anything to hide."

"We're got our theory, ain't we, that the big discovery's yet to be found? This stuff that's been turned up ain't nothin' but chicken feed. We've got the richest placer claims along the new bed of Loon creek and we'll be lucky if they bring us fifty thousand dollars." McKenzie Joe's keen eyes swept the valley. "There's a bonanza around here somewhere, if we ever find that old river bed. The idea's worth keeping to ourselves."

"I suppose so. On the other hand, Kenning's a geologist. It might pay us to give him a little information—even cut him in."

"The Idea's Worth Keeping to Ourselves."

McKenzie Joe rose and tossed the stick away.

"Not while I'm a partner in this shebang," he said. Then, hesitantly, "I guess I'll go eat."

"You wont change your mind, and come with us?"

"Oh, not tonight. You've all got things to talk about."

Hammond watched him stalk away; it was not his imagination, he told himself, which made him feel that Joe was different. Silent, almost morose at times; working quietly and without response while Hammond planned, enthusiastically for the future, when Kay would be there and Sapphire Lake a city.

"Joe must be getting old," he said at last, and dropping down the step, hurried through the criss-cross of cabins and tents toward the trail which led to the cottage.

Kay turned from a window and strode toward him with a swinging step which matched her outdoor clothing.

"You old dear!" she exclaimed.

"I thought I'd better hurry back," Hammond explained buoyantly. "Just to be sure you were really here."

"If your ears rang like mine, you'd know we were here," broke in Mrs. Joyce. "Sitting cooped up in that airplane for I don't know how many hours!" She sat cross-legged on one of the two bunk-like beds, poking a cigarette into a long, green holder. Kay cut in.

"Can you imagine," she asked, as she came close to Jack, and with a maternal manner, straightened his tie. Only her close-fitting jersey imprisoned her full breasts; they touched Hammond's arm, yielding softly to pressure. "We hardly paused all the way here from Vancouver."

Hammond barely heard her; his blood was stinging in his veins.

"Good thing we didn't have to turn back when we got here," growled Timmy, from his sprawled position on a rough chair. "We'd have been in a hell of a fix if this lake had been frozen over."

"But it wasn't frozen, Thickwit," Kay jibed. She turned from Hammond and leaned over the back of Timmy's chair. She tweaked the pilot's nose. "Always the cheerful little earful! He's had us smashed up a dozen times since we started."

"Well, who wouldn't be careful? Finding a place that hardly exists in a crate like that old boat of mine. A fellow's got to think of his responsibilities."

"How many stops did you make getting here?" Jack asked.

"Only a couple," Kay volunteered. "Once at Stewart lake for gas and for Timmy to study his maps. Then again at Fourcross."

Jack whistled.

"You moved right along."

Mrs. Joyce regarded her cigarette holder.

"That's what happens when a girl really wants to see a man," she observed calmly. Hammond laughed and could think of nothing to say. Kay crossed the room and dropped into a chair.

"Now that it's over, I'm tired." Then she added, "Couldn't we have dinner served up here?"

Hammond shook his head.

"Nothing like that. It's a matter of getting it when the cook's willing. I'll have things organized for you in a day or two—I've got a line on a woman who can come here and do the work for you."

"Wonderful," said Mrs. Joyce, with her usual lack of expression.

"And in the meanwhile," announced Timmy, "we'll eat at the Quick and Dirty and like it."

"When?" asked Mrs. Joyce.

"We're waiting for Bruce Kenning, Mother."

"As usual; we've waited for him for ten years."

"Yes—father always said he was the latest thing in mining men."

Hammond laughed louder than anyone at that. Jokes had been few for him in these long weeks of waiting.

Bruce Kenning was coming in the door. After that, the conversation became jumbled; so much to be gone over again, calls for food from Timmy Moon, monosyllabic cut-ins by Mrs. Joyce, questions to be re-answered about the trip. But at last they were down the hill and at the crude doorway of the Slumgullion. For a moment a queer feeling of trepidation shot through Jack Hammond. For the first time, he wondered what Kay would think of these crude surroundings which she would find every side, the lack of comforts of civilization. But the answer came almost as soon as his mental question. Kay had tipped her blonde head and glanced about her at the sloping log building, with its glassless windows of mosquito netting, its faint illumination of two ancient oil lamps, its vague forms, seated at rough tables, dimly discernible through the netted door.

"Isn't it cute!" she exclaimed. "Just like a movie set. Look, Mother, it's simply gorgeous!"

"Gorgeous is hardly the word," came the acidulous rejoinder from the angular Mrs. Joyce.

"Well," Hammond laughed with relief, "at least it's unique. Set this down in the main street of an American city and you'd have a crowd around it in five minutes." Suddenly he drew back. "Oh, Kay!"

"Yes," she turned from the door.

"Here's someone I'd like you to meet."

Jeanne Towers was approaching, also headed for the restaurant. She hesitated as she noticed the little throng in front of the doorway, but Hammond called her forward.

"Jeanne," he said, "here are my friends from Seattle. Kay, this is Jeanne Towers. Remember I wrote you about her?"

No Longer An Honor

French Writer Returns Award Given Him By Mussolini

The noted French playwright, Henry Bernstein, returned to Premier Mussolini of Italy the insignia of an officer of Saint Maurice and Lazare as a protest to Italy's new anti-Semitic racial policy.

In a telegram to Mussolini, Bernstein declared:

"You accorded me one of the highest distinctions of your realm in naming me an officer of Maurice and Lazare. Permit me to return the rosette.

"I would no longer consider it an honor to wear it when you persecute irreproachable Italian citizens in the name of the recently invented racialism."

New Grape Products

Will Help Take Care Of Large Crop In South Africa

The South African News Letter says South Africa grape farmers, menaced by over-production of wine, are trying desperately to find new grape products. The latest products to be marketed are grape jelly, glace grapes and grape slabs.

The jelly is similar in appearance to red currant jelly, and is intended for use in the same way. The glace grapes look like jujubes; they are made from a stiffer mixture than the jelly. The slabs are a semi-solid food containing all the nutriment of the grape juice, skins and seeds.

Famed Hospital In France Closed For Lack Of Patients

One of Paris' most famed institutions is closing down — the Foch Foundation hospital, endowed in part by Madame Jacques Balsan, formerly Consuelo Vanderbilt, although one of the most modern hospitals in France, is going out of business for lack of patients. Mme. Balsan, once the world's richest woman, generously contributed to the Foch Foundation and took particular interest in keeping its equipment and service up to date.

Unable to read Braille because they had lost their fingers, blind lepers of the Barbadoes sent a request for talking books to the National Institute and several books reproduced on phonograph records have been sent.

Thomas Jefferson wrote his own epitaph.

Seek Air Record

Britain Prepares To Attack World's Distance Record Held By Russia

The seaplane Mercury, which, it is reported, is being groomed for a hop to Cape Town, now is rumored as preparing to attack the world distance record held by Soviet Russia.

It is suggested the famous upper half of the pick-a-back 'plane, which this summer flew to Montreal and New York, may be sent to Scotland for a take-off that would increase the airline distance record beyond the 6,306 miles Russian fliers covered when they established the record in a flight to the United States' Pacific coast.

International regulations specify new record seekers must add 62 miles to the existing figure to claim the title. Southampton to Cape Town is only 5,960 air miles and the Mercury is expected to start from north of the Firth of Forth.

While secrecy was maintained over the Mercury's plans, it was announced that examination of the Albatross No. 1 which cracked up August 27 disclosed a fault which caused the break her back while landing. The fault has been corrected in Albatross No. 2 which has been tested successfully.

The second Albatross is expected to start soon a series of long distance tests, preparatory to a trans-Atlantic hop with which Imperial Airways will resume its interrupted North Atlantic research program. Imperial Airways proudly pointed to the "Heracles," veteran air liner which established a world mileage record on its "birthday," having flown a total of 1,250,000 miles, equal to 50 times around the Equator, and has carried 95,000 passengers without making an emergency landing or injuring any passenger.

Life On The Farm

Farmers Have Lower Death Rate Than Business Or Professional Men

If you would live to a ripe old age, go to or remain on the farm.

This is one of the interesting findings made by the public health service in a study covering ten of the American States. Agricultural workers in the states studied were shown to have a much lower death rate than successful business and professional men.

The mortality rate of agricultural workers per 1,000 population, between the ages of 15 and 64, was 8.2 per cent. That of professional men was seven per cent. The highest rate, 13.1 per cent., was for unskilled workers, while the rate for all classes was 8.7 per cent. Contributing factors to the high death rate in the unskilled class include diet, housing, amount of medical care, contact with infected persons and low income. Tuberculosis and pneumonia were the two most outstanding causes, with accidents ranking third.

Might Be A Bargain

The Italian newspaper Messagero reported that the golden crown of Haile Selassie, once Emperor of Ethiopia, has been placed on sale by a London jeweler for a price of £500. The crown, studded with 718 diamonds, is a "great bargain at such a small price," the newspaper's London correspondent reported, "provided that the diamonds are not made of glass."

Her brood of eight cygnets dying from a rare disease, a swan refused to leave her nest at Eton College, England, or to allow anyone to approach. After two weeks college employes put a fence around the nest so the feathered mother could have complete solitude.

The women of Walcheran, Holland, wear gold ornaments on their heads to indicate the village from which they come on market days.

Railways In India

Deal In Remarkable Way With Rush Of Pilgrim Traffic

Richard Halliburton, some years ago was able to beat his way about India so freely that in writing of his experiences he gave one the impression that the railway system was rather loosely run.

Automobiles are not so plentiful in that country and the trains get the bulk of the travelling business when crowds want to converge upon any one point.

The Kumbh mela attracts devout Hindu pilgrims from all over the country as it is considered a most auspicious moment for a bath in the holy Ganges. It falls once in 12 years.

Some remarkable facts and figures have been issued illustrating the achievement of the East Indian Railway in dealing with the phenomenal rush of pilgrim traffic to the Kumbh mela at Hardwar, recently concluded.

The highest figures on any one day for inward and outward traffic were:

Inward—44 Special trains, 7 Regular trains—Total number of passengers 68,000.

Outward—41 Special trains, 7 Regular trains—80,000 passengers approximately.

On an average each special train provided accommodation for 1,500 passengers.

During the mela period from March 12 to April 13 a total of 347 special trains were run to Hardwar and no fewer than 543,755 passengers detrained at that station.

Happy Ending

Father And Child Re-United After Thirty-Seven Years' Separation

A sheet of sacred music bearing the composer's name is bringing a father and daughter together in a trans-Atlantic reunion 37 years after the father went to Canada.

Marion Beeton Pull, district nurse near Maidstone, England, told reporters her father went to the Dominion shortly before she was born and that her mother died apparently without informing him of the birth.

She was adopted and raised by a foster mother who died when she was 21. Three years ago Miss Pull was playing an organ adaptation of "Abide With Me", when she noticed the composer's name was Edwin Pull.

The music was published in Toronto so Miss Pull wrote Police Chief Draper who got in touch with Pull.

"Father and I have written each other hundreds of pages of letters," she said, "now he is planning to visit England and may arrive next month. He has been a church organist in Toronto."

Pull has remarried in Canada and has two sons.

Annoying For Others

Psycho-Analyst Adopts Queer Way To Cure Patients

Young men entered one of London's most exclusive restaurants, sat at tables with "reserved" signs, and fiercely refused the headwaiter's request to move to another table.

They read the menu out loud, shouted that they could not see anything worth eating, then walked out.

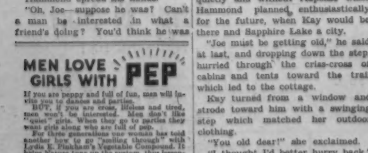

"A psycho-analyst made us do it," they told the restaurant owner.

"He sends all his patients to fashionable restaurants and tells them to make a scene—to build up self-confidence."

Two members of the English House of Commons do not take the salary of $2,000 a year which is due them.

The walrus attains a weight of one and one-half tons.
